

## ICL**POTASH**PLUS<sup>®</sup>

### ICL PotashpluS

Potash plus Polysulphate: a winning combination

0 + 0 + 37 + 8 + 2,8 + 23 N P205 K20 CaO MgO S03

## **Guaranteed analysis**

0..:..

Oxide		
Ν	Total Nitrogen	0%
P205	Phosphorus Pentoxide	0%
K20	Potassium Oxide	37%
	Water Soluble (K2O)	37%
CaO	Calcium Oxide	8%
	Water soluble (CaO)	8%
MgO	Magnesium Oxide	2.8%
	Water soluble (MgO)	2.8%
SO3	Sulphur trioxide	23%
	Water soluble (SO3)	23%

## **Description**

ICL PotashpluS<sup>™</sup> is a granular fertilizer made with Polysulphate and potassium chloride. It provides crops with vital potassium, sulfur, magnesium, and calcium in a single application. ICL PotashpluS provides 37% potassium oxide, consisting of 30% potassium chloride and 7% as potassium sulfate. The sulfur, magnesium, and calcium in PotashpluS are all in 100% sulfate (SO<sub>4</sub>) form. With ICL PotashpluS, there is no need to choose between chloride or sulfate forms of potassium fertilizer: 20% of the potassium is in sulfate form, which reduces the chloride input by 50% compared with KCI.

#### **Benefits**

Notassium, sulfur, magnesium, calcium, and boron all rolled into one

N Bigger, better yield

#### How to use

- 1 Apply directly to fields, orchards, and plantations. When bulk blending, this product can be combined with all other fertilizers.
- Properly seal partly used or damaged bags.
- 3 Store under dry conditions.
- If you need more information, please contact your technical support.

# **Application rates**

Trial first on a small scale before changing the rate, or any other variables. As circumstances can differ and the application of our products is beyond our control, ICL cannot be held responsible for any adverse results.

#### Attention

Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and as the application of our products is beyond our control, ICL cannot be held responsible for any adverse results. Contact your ICL advisor for more detailed advice.
