Description

Nutri Liquid Optima 4-2-8 PCI+1MgO is a liquid fertiliser for fertigation pure in chloride with a nitrification inhibitor DMPP, which favours the greater permanence of nitrogen in the soil, reducing the risk of nitrogen leaching. It contains Nitrogen, Phosphorus, Potassium and Magnesium.

Benefits

- \\ Reduces risk of nitrate leaching
- \\ Keeps nitrogen in the soil for longer
- \\ Increases nitrogen uptake efficiency
- \\ Increases harvest yield and quality
- \\ Made from top-quality raw materials
- \\ Lower environmental impact, favouring the development of more sustainable agriculture

How to use

- 1 For specific information or recommendations, contact your nearest ICL distributor or representative for your area.

Attention

Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and as the application of our products is beyond our control, ICL cannot be held responsible for any adverse results. Contact your ICL advisor for more detailed advice.
