Description

Nutri Liquid Optima 4.6-1.2-6 LCI+1.2CaO is a liquid fertiliser for fertigation low in chloride with a nitrification inhibitor (DMPP) which favours the greater permanence of nitrogen in the soil, reducing the risk of nitrogen leaching. It contains Nitrogen, Phosphorus, Potassium and Calcium.

Benefits

- \\ Reduces risk of nitrate leaching
- \\ Keeps nitrogen in the soil for longer
- \\ Increases nitrogen uptake efficiency
- \\ Increases harvest yield and quality
- \\ Made from top-quality raw materials
- \\ Lower environmental impact, favouring the development of more sustainable agriculture

Application rates

Injection and dispensing of the liquid fertiliser directly into the irrigation water based on the required increase in conductivity or volume according to the needs of the crop in each phenological stage.

Trail first on a small scale before changing the rate, or any other variables, As circumstances can differ and

Attention

Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and as the application of our products is beyond our control, ICL cannot be held responsible for any adverse results. Contact your ICL advisor for more detailed advice.
