

# ProSelect®

## Thermal Force

Turn up the heat

## Description

ProSelect® Thermal Force is a unique blend providing excellent performance in hot areas with limited rainfall or irrigation. All the varieties used in Thermal Force boast excellent purity and germination and have been bred specifically to tolerate heat and drought. The mixture creates a very dense surface that's dark green all year round and thrives well in shaded areas too. Thermal Force is a favourite of sod growers thanks to its extensive and intense root growth.

## Benefits

- Excellent heat and drought tolerance
- Incredibly dense turf
- Terrific shade tolerance

## How to use

Mowing height: 35-50 mm. If you need more information, please contact your technical support.

## Application rates

Average sowing rate:

35 g/m<sup>2</sup>

## Attention

Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and as the application of our products is beyond our control, ICL cannot be held responsible for any adverse results. Contact your ICL advisor for more detailed advice.
