

ProSelect®
Straights

Rio

100% Cynodon dactylon

Description

The top performer for warm-season sports turf use

ProSelect® Rio is a seeded Bermuda grass variety that's top-rated in several key areas of turf performance in the NTEP trials system. In further trials conducted by the University of Pisa, Rio was consistently ranked as a top performer for sports turf use. Rio exhibits excellent cold and frost tolerance, as well as early spring green-up, making it a great choice for both warm season and transitional zones. The combination of fine leaf texture, dense growth in spring and summer, and dark-green colour promises great performance. And with strong tolerance to leafspot and dollar spot, less herbicide is needed than many other leading varieties.

Content

100% Bermuda grass (Cynodon dactylon)

Benefits

- Great seedling vigor
- Smartstart treated seed to support quick germination

Outstanding disease tolerance

Application rates

Average sowing rate

5 g/m²

Try first on a small scale before changing the rate, or any other variables. As circumstances can differ and the application of our products is beyond our control, ICL cannot be held responsible for any adverse results.

How to use

Mowing height: 2 – 5 mm.

If you need more information, please contact your technical support.

Attention

Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and as the application of our products is beyond our control, ICL cannot be held responsible for any adverse results. Contact your ICL advisor for more detailed advice.
