

ProSelect®

Rubicus

100% Festuca rubra commutata

Description

For fine-turf that copes well in shade and drought ProSelect® Rubicus chewing fescue is for intensively managed and low maintenance areas alike. An excellent visual appearance even under stressed conditions, such as shade and summer drought. Perfect for any fine turf area, as well as sod mixtures where top-end seed cleanliness is required. Rubicus has a bunch-type growth habit, with very fine blade width and low upright growth. Forms a uniform turf, with dark dense colour and performs well in a wide range of well-drained soil types of pH range 5.5 to 8.0.

Benefits

- \\ Hard-wearing and tolerates shade
- \\ Resistant under stress
- \\ Adaptable to mown or unmown management

How to use

Mowing height: 10 – 25 mm. If you need more information, please contact your technical support.

Application rates

Average sowing rate 20 g/m²

Attention

Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and as the application of our products is beyond our control, ICL cannot be held responsible for any adverse results. Contact your ICL advisor for more detailed advice.
