Description

No need to let your beautiful lawn go into hibernation over those long cold winter months with Landscaper Pro® Pre Winter. See that your turf not only survives winter, but leaps into spring thanks to this fertilizer's 4-5 month controlled nutrient release. With its high level of potassium, you can ensure lawn stands up to the cold and the wet with its reinforced plant cell walls and enhanced water regulation.

Benefits

- Keeps lawn in top condition through until spring
- Increased potassium for strong cell walls and better water regulation
- Controlled nitrogen release to fight plant stress

How to use

1. Apply directly to dry foliage.
2. Watering-in after application helps dispersion and boosts immediate effect. Do not apply during drought or frosty conditions.
3. You should apply following completion of aeration programs, including scarification, slitting and/or hollow timing to prevent damage to the granules.
4. Properly seal partly used or damaged bags.
5. Store under dry conditions.
6. If you need more information, please contact your technical support.

Application rates

Range of recommended rates:	20.00 - 45.00 g/m²
Average recommended rate:	35 g/m²

Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and as the application of our products is beyond our control, ICL cannot be held responsible for any adverse results.
