Description

When your shaded turf is starved of the sunlight it so craves, let the light in with Landscaper Pro® Shade Special. This specially designed formula helps fix nutrients within the soil, which are then released over a six-week period. Help your grass get back on its feet after those long winter months, enhance its lush green color, and fight off any unwanted moss with one simple application.

Benefits

- Boosted iron content for moss suppression and rich color
- Noticeable results in just a few days
- Increased nitrogen for stimulating growth and restoring bare spots

How to use

- 1 Contains Iron: Do not allow product to come into contact with marble, stone, fabric, concrete, swimming pools, etc. As product can cause discoloration, brush off immediately if spilt on concrete, paving slabs, clothes, etc.
- 2 Due to product's rust patch-inducing iron content, remove immediately if it comes into contact with patios, tiles and other hard surfaces.
- 3 Apply from March to May.
- 4 Apply to dry grass. Do not apply under drought or frost conditions.
- 5 Promote rapid grain penetration and enhance starting effect by irrigating after spreading.
- 6 Spread using the AccuPro 2000.
- 7 If you need more information, please contact your technical support.
