

Finesse

Rough patches just require a little finesse

Description

If you are looking for a low-maintenance, disease-resistant grass seed-mixture for varying conditions and soil types, look no further than Landscaper Pro® Finesse. Enrich your lawns by producing a dense, fine-leaved, and deep green sward. Made up of different seed types, the ryegrass component speeds up initial growth and increases tread resistance, while the red fescue component makes your grass resistant to drought and better suited to shaded areas.

Benefits

- \\ Low nitrogen levels and low maintenance
- \\ Mixed grass seeds for short and long-term plant health
- \\ Produces a disease-resistance dense sward

How to use

- 1 Recommended mowing height: from 15mm.
- 2 Recommended fertilizer type: Micro and Mini granules.
- 3 If you need more information, please contact your technical support.

Application rates

Sow: 25-35 grams/m²

Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and as the application of our products is beyond our control, ICL cannot be held responsible for any adverse results.
