Oxide		
N	Total Nitrogen	14%
	Ammoniacal nitrogen (N-NH4)	10.9%
	Urea nitrogen (N-Urea)	3.1%
P2O5	Phosphorus Pentoxide	0%
K2O	Potassium Oxide	5%
	Water Soluble (K2O)	5.0%
Fe	Iron	6.00%

Description

Do you want to keep moss under control and feed your lawn at the same time? Landscaper Pro ® Mosscontrol does it both. With a whopping 18% nitrogen and 8% iron, it stimulates the grass plant while rapidly covering any bare patches. You'll see results in just a few days.

Benefits

- \\ Controls moss and feeds your lawn at the same time
- \\ Covers bare patches
- \\ Small granules mean maximum contact for best moss control

How to use

- 1 Apply to dry foliage in the spring or autumn. Watering-in after application aids dispersion and gives a faster initial effect. Avoid applications during frosty or drought conditions. Only apply after aeration programs, i.e. hollow tining, slitting, and/or scarification to prevent granule damage.
- 2 Contains iron. Do not apply in case of risk of contact with concrete, marble, stone, fabric, swimming pools, etc. If spilt on these areas, brush off immediately as the product can cause discoloration.
- 3 If you need more information, please contact your technical support.

Recommended period of use

JAN	FEB	MAR	APR	MAY	JUN	JUL	AUG	SEP	OCT	NNOV	DEC

Application rates

Application rate:	30 g/m2
