Description

Boost your turf throughout the early in the growing season and summer with Sierrablen® Plus Zero Phosphate N-Starter 3M. Use this cost-effective, phosphate-free fertilizer to promote all-round healthy turf growth and reduce the risk of Poa invasion. With ICL's patented Poly-S technology, you can provide your turf with a controlled 3-month release of nitrogen for optimum healthy growth. Thanks to the addition of calcium and magnesium, your turf is sure to become stronger and greener than ever before.

Benefits

- \\ Phosphate-free to avoid Poa invasion
- \\ Cost-effective with low application rates
- \\ Mini granules for even application

How to use

- 1 Apply directly to dry foliage.
- 2 Watering-in after application helps dispersion and boosts immediate effect. Do not apply during drought or frosty conditions.
- 3 You should apply following completion of aeration programs, including scarification, slitting and/or hollow tining to prevent damage to the granules.
- 4 If you need more information, please contact your technical support.

Recommended period of use

JAN	FEB	MAR	APR	MAY	JUN	JUL	AUG	SEP	OCT	NOV	DEC

Application rates

Average Recommended Rate:	25.00-35.00 g/m ²
---------------------------	------------------------------

Trial first on a small scale before changing the rate, or any other variables. As circumstances can differ and the application of our products is beyond our control, ICL cannot be held responsible for any adverse results.

Attention
