Fe	Iron	3.00%

Description

Greenmaster® Pro-Lite Turf Tonic is a micro-granular fertilizer for high-quality, fine turf nutrition. With 8% nitrogen and 3% magnesium, it contains the right balance for low input nutrition to a playing surface. The micro-granular particles are quick to disperse, for rapid response and results, plus consistency and uniformity.

Benefits

- Micro-granules allow even distribution, even at low rates of application
- Release pattern delivers reliable results
- High-quality ingredients provide dependable release patterns

How to use

- 1 Apply to dry foliage and irrigate after 1-2 days if no rain has fallen
- 2 Irrigation will aid dispersion and minimize any risk of mower pick-up on close-mown surfaces.
- 3 Do not apply if there is a risk of contact with concrete, marble, stone, fabric, etc.
- 4 Brush off any spillages on paving slabs, concrete, clothes, etc. immediately, as product may cause discoloration.
- 5 If you need more information, please contact your technical support.

Recommended period of use

JAN	FEB	MAR	APR	MAY	JUN	JUL	AUG	SEP	OCT	NNOV	DEC

Application rates

Recommended Rate:

25-35 g/m2

Trial first on a small scale before changing the rate, or any other variables. As circumstances can differ and the application of our products is beyond our control, ICL cannot be held responsible for any adverse results
