

ProSelect®

Groundforce

100% Lolium perenne

Description

A force for great grass ProSelect® Groundforce is a stunning perennial ryegrass that delivers terrific overall performance. No wonder we include it in some of the ProSelect® blends for use in golf, sports, and general recreation areas. Groundforce produces a fine, dense mid-green sward with a clean cutting blade and good persistency. Offering excellent drought and disease tolerance, such as rust and red thread resistance, the variety has gained a high score of 7.4 for cleanness of cut – making it one of the preferred choices for top quality turf.

Benefits

- \\ Excellent seedling vigor
- \\ Clean cutting
- \\ Fine-leaved

How to use

Keep seedbed moist during germination and establishment. Germinates in 5-8 days with optimal soil temperatures or 21-28 days at low temperatures. Full coverage expected in 6-8 weeks. First mowing recommended when turf reaches approximately 4 cm in height. For best results, fertilize at annual rate of 20-25 g/m² of nitrogen. Deep, infrequent irrigation is best during cooler months. Increase frequency during the summer months. Reduce irrigation to assist spring transition. Recommended mowing height of 1 – 4 cm.

Application rates

For sports turf / residential / commercial, approximately 30-35 g/m² in the early autumn and late spring.

Try first on a small scale before changing the rate, or any other variables. As circumstances can differ the application of our products is beyond our control, ICL cannot be held responsible for any adverse
