	Copper EDTA (Cu)	0.02%
Fe	Iron	2.400%
	Water soluble (Fe)	2.400%
Mn	Manganese	0.035%
Zn	Zinc	0.04%

### Description

This state-of-the-art liquid is a must in your turf management program: it conditions turf before stress but it also helps it recover from stress. Ideal for any lawn, sports field, fairway, or fine turf area. It is chock full of nutrients, wetting agents and biostimulants to help your turf survive any trauma: nitrogen for color, density, and growth; iron for a quick color boost; amino acids to aid foliar uptake during stressful conditions; carbohydrates for improved soil biology, plus a surfactant for better uptake. You'll notice a difference in no time. Stressbuster is a great tank mix partner and is ideal to use all year round.

### Benefits

- Advanced pre-stress conditioner
- Aids swift recovery after stress
- Visible color improvement fast

## How to use

- 1 Apply from March to October, depending upon conditions
- 2 Vitalnova products may be tank-mixed with other ICL products, check tank mix table for actual compatibility.
- 3 Mix with Colour Pro spray pattern indicator to assist spraying and minimize spray drift
- 4 The water volume used to apply Vitalnova products will affect how the components are utilized.
- 5 If you need more information, please contact your technical support.

## Recommended period of use

JAN	FEB	MAR	APR	MAY	JUN	JUL	AUG	SEP	OCT	NNOV	DEC

## Application rates

### Recommended Rate:

20 – 50 l/ha

Trial first on a small scale before changing the rate, or any other variables. As circumstances can differ and the application of our products is beyond our control, ICL cannot be held responsible for any adverse results.

## Attention

Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and as the application of our products is beyond our control, ICL cannot be held responsible for any adverse results. Contact your ICL advisor for more detailed advice.
