Guaranteed analysis

Oxide		
N	Total Nitrogen	16%
	Ammoniacal nitrogen (N-NH4)	3%
	Urea nitrogen (N-Urea)	11%
	Organic nitrogen	2.0%
P2O5	Phosphorus Pentoxide	3%
K2O	Potassium Oxide	6%
	Water Soluble (K2O)	6%
MgO	Magnesium Oxide	2%
Fe	Iron	0.5%

Description

Gronamic® Golf High N delivers steady growth for your golf grass through spring and summer. Its high level of nitrogen and its mineral and organic nutrients keep your grass fit as a fiddle and growing at a sustained rate. Golf High N is packed with all the key macronutrients and a dose of iron, so your golf turf looks fabulous, even under intense use.

Benefits

- High nitrogen for sustained grass growth on golf courses
- Polyhalite mineral supplies Ca, Mg & K for healthy a plant
- Supplies carbon to the soil

How to use

- 1 Apply to dry foliage from April to August. Irrigation or rainfall will assist dispersion and minimize risk of mower pick-up. Water in if no rain falls within 1-2 days after application.
- 2 Avoid applying during frosty or drought conditions. Delay cutting or grooming for 2 days after application to allow the product to disperse.
- 3 Contains iron. If spilt on pavement, concrete, or decorative surfaces, brush off immediately to prevent staining.

Recommended period of use

JAN	FEB	MAR	APR	MAY	JUN	JUL	AUG	SEP	OCT	NNOV	DEC

Application rates

Recommended rate:	25-40 g/m2
-------------------	------------

Trial first on a small scale before changing the rate, or any other variables. As circumstances can differ and the application of our products is beyond our control, ICL cannot be held responsible for any adverse results.
