Guaranteed analysis

Oxide		
N	Total Nitrogen	16%
	Ammoniacal nitrogen (N-NH4)	3%
	Urea nitrogen (N-Urea)	11.5%
	Organic nitrogen	1.5%
P2O5	Phosphorus Pentoxide	3%
K2O	Potassium Oxide	6%
	Water Soluble (K2O)	6%
MgO	Magnesium Oxide	2%
Fe	Iron	0.5%

Description

Sustained growth for your sports turf is what you get with Gronamic® Sport High N. It's perfectly suited to use throughout the main growing season. High in nitrogen, plus mineral and organic nutrients to keep your sports pitches and landscaped areas well fed. Sport High N is packed with all the key macronutrients plus iron, keeping your plant healthy and looking great – even under high wear.

Benefits

- High nitrogen for sustained grass growth on sports pitches
- Polyhalite mineral supplies Ca, Mg & K for healthy a plant
- Supplies carbon to the soil

How to use

- 1 Apply to dry foliage from June to October.
- 2 Irrigation or rainfall will assist dispersion and minimize risk of mower pick-up. Water-in if no rain falls within 1-2 days after application.
- 3 Avoid applying during frosty or drought conditions. Delay cutting or grooming for 2 days after application to allow the product to disperse.
- 4 Contains iron. If spilt on pavement, concrete, or decorative surfaces, brush off immediately to prevent staining.
- 5 If you need more information, please contact your technical support.

Recommended period of use

JAN	FEB	MAR	APR	MAY	JUN	JUL	AUG	SEP	OCT	NOV	DEC

Application rates

Recommended rate:

25-40 g/m2

Trial first on a small scale before changing the rate, or any other variables. As circumstances can differ and the application of our products is beyond our control, ICL cannot be held responsible for any adverse results.
