Characteristics

Description

A potash-rich formula for a higher flower or fruit yield. Ideal if you want an N:K ratio of 1:1.5, a popular formulation among pot plant growers. Urea provides an extra helping of nitrogen a few days after application. Designed for peat-based potted plants, bedding plants and container nursery stock. Your plants will respond fast to this fertilizer with its fully water-soluble granules. High-quality composition with no ballast. Contains NPK, magnesium and trace elements. Plus, the unique Peters® M-77 chelating formula! This product is no longer produced, please contact your ICL Specialty Fertilizers advisor for more information.

Benefits

- Rich in potash to encourage better performance from plants bearing flowers or fruit
- Small, easy-dissolve granules
- N:K ratio of 1:1.5

How to use

1. It’s best to prepare your stock solution 1-2 hours before use, stir well or use warm water to make sure that Peters® Professional Potash Special dissolves completely.
2. Do not mix this product with Peters® Excel.
3. Store under dry conditions.
4. Properly seal partly used or damaged bags.
5. If you need more information, please contact your technical support.

Application rates

Continuous feeding	Occasional feeding
0.5 - 1.5 g/liter	(for example, once a week) 0.8 – 2 g/liter

Attention Trial first on a small scale before changing the rate, application or any other variables. As circumstances can differ and as the application of our products is beyond our control, ICL Specialty Fertilizers cannot be held responsible for any adverse results.
