

# Solinure® FX

12

The perfect FiX for your starter crops

13 | 40 | 13  
N P2O5 K2O

## Guaranteed analysis

Oxide		
N	Total Nitrogen	13%
	Ammoniacal nitrogen (N-NH4)	6.9%
	Urea nitrogen (N-Urea)	6.1%
P2O5	Phosphorus Pentoxide	40%
	Water soluble (P2O5)	40.0%
K2O	Potassium Oxide	13%
	Water Soluble (K2O)	13.0%

## Characteristics

## Description

Give your open field-grown fruits and vegetables the perfect start with Solinure® FX 12 fertigation fertilizer. Designed specifically for soil-based applications, this high-phosphorus NPK formula is your ideal cost-effective solution for boosting your crops' root development and overall growth during their starter stages. Complete with urea and chloride, and without any added trace elements, this acidifying product works wonders in keeping your drip lines clean after application.

## Benefits

- \\ Balanced nitrogen and potassium formula with boosted phosphorus
- \\ Highly dependable product
- \\ No added trace elements

## How to use

- 1 Use Solinure® FX 12 for the growing and ripening stages of fruit.
- 2 Store under dry conditions.
- 3 Make sure you properly seal partly used or damaged bags.
- 4 For specific advice and recommendations, contact ICL or your professional advisor.

## Application rates

Crops:	kg/ha
Open field and protected areas crops and vegetables:	40-60 kg/ha per week
Berry crops, trees, soft and stone fruits:	30-50 kg/ha per week

\*Average recommended rate: Apply 4-5 kg/1000m<sup>2</sup> per week Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and the application of our products is beyond our control, ICL cannot be held responsible for any adverse results.

## Attention

Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and as the application of our products is beyond our control, ICL cannot be held responsible for any adverse results. Contact your ICL advisor for more detailed advice.
