## Guaranteed analysis

Oxide		
N	Total Nitrogen	17%
	Nitrate nitrogen (N-NO <sub>3</sub> )	1.6%
	Urea nitrogen (N-Urea)	15.3%
P <sub>2</sub> O <sub>5</sub>	Phosphorus Pentoxide	8%
	Water soluble (P <sub>2</sub> O <sub>5</sub> )	8.0%
K <sub>2</sub> O	Potassium Oxide	27%
	Water Soluble (K <sub>2</sub> O)	27.0%
CaO	Calcium Oxide	3.0%
	Water soluble (CaO)	3.0%

## Description

If your soil-grown, open field fruit and vegetable crops are suffering from a lack calcium, reach for Solinure® FX 15 fertigation fertilizer. This low-phosphorus, high-potassium NPK formula contains added calcium to cure any calcium deficiencies among your crops. This acidifying fertilizer, while containing chloride and urea, is free from added trace elements, thereby saving you unnecessary expense and providing your plants only with exactly what they need.

## Characteristics

## Benefits

- Designed for soil-based open field application
- Keeps drip line systems clean
- Highly dependable product

## How to use

- 1 Use Solinure® FX 15 for growing and ripening stages.
- 2 Store under dry conditions.
- 3 Properly seal partly used or damaged bags.
- 4 For specific advice and recommendations, contact ICL or your professional advisor.

## Application rates

Crops:	kg/ha:
Open field and protected areas crops and vegetables:	40-60 kg/ha per week
Berry crops, trees, soft and stone fruits:	30-50 kg/ha per week

Average recommended rate: Apply 40-60 kg/10,000m<sup>2</sup> per week Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and the application of our products is beyond our control, ICL cannot be held responsible for any adverse results.

## Attention

Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and as the application of our products is beyond our control, ICL cannot be held responsible for any adverse results. Contact your ICL advisor for more detailed advice.
