Characteristics

Description

When your tired-looking fruit and vegetable crops crave that perfect nutritional boost, look no further than Solinure® FX 16 fertigation fertilizer. This acidifying high-potassium, low-phosphorus NPK formula contains added magnesium, serving to boost your plants' overall chlorophyll content. Free from added trace elements, this acidifying fertilizer contains quality urea and chloride, with the added bonus of keeping your drip line systems in good condition. As with all products in the Solinure FX range, this solution gives you great value for money and top performance.

Benefits

- \\ Contains urea and chloride
- \\ Designed for soil-based open field application
- \\ No added trace elements

How to use

- 1 Use Solinure® FX 16 for growing and ripening stages.
- 2 Store under dry conditions.
- 3 Properly seal partly used or damaged bags.
- 4 For specific advice and recommendations, contact ICL or your professional advisor.

Application rates

Crops:	kg/ha:
Open field and protected areas crops and vegetables:	40-60 kg/ha per week
Berry crops, trees, soft and stone fruits:	30-50 kg/ha per week

Average recommended rate: Apply 40-60 kg/10,000m² per week Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and the application of our products is beyond our control, ICL cannot be held responsible for any adverse results.

Attention

Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and as the application of our products is beyond our control, ICL cannot be held responsible for any adverse results. Contact your ICL advisor for more detailed advice.
