	Water Soluble (K2O)	18.0%

Characteristics

Description

Help your fruit and vegetable crops navigate their tricky growing and ripening stages with Solinure® FX 18 fertigation fertilizer. Designed for soil-grown, open field application, this low-phosphorus balanced NPK fertilizer will perfectly cater to your plants' unique nutritional needs. Offering fantastic value for money, this fertilizer foregoes unnecessary trace elements, while still containing high-quality urea and chlorides. And that's not all, as it keeps your drip line systems looking absolutely spotless.

Benefits

- \\ Balanced nitrogen and potassium NPK content with low phosphorus
- \\ Highly dependable product
- \\ Keeps your drip lines clean

How to use

- 1 Use Solinure® FX 18 for growing and ripening stages.
- 2 Store under dry conditions.
- 3 Properly seal partly used or damaged bags.
- 4 For specific advice and recommendations, contact ICL or your professional advisor.

Application rates

Crops:	kg/ha
Open field and protected areas crops and vegetables:	40-60 kg/ha per week
Berry crops, trees, soft and stone fruits:	30-50 kg/ha per week

Average recommended rate: Apply 40-60 kg/10,000m² per week Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and the application of our products is beyond our control, ICL cannot be held responsible for any adverse results.

Attention

Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and as the application of our products is beyond our control, ICL cannot be held responsible for any adverse results. Contact your ICL advisor for more detailed advice.
