Description

Nutrivant Cereals 6-23-35+1MgO+0.1B+ME is a fully soluble high PK foliar formulation containing macro and micronutrients with magnesium and boron designed to precisely meet the needs of cereal crops. Utilizing Fertilvant technology for an advanced and persistent delivery system guarantees a homogenous distribution of microdrops across the leaves, enhances the permeability of the cuticle to active substances, and securely fixes the active ingredients to the leaf surface to delay evaporation. Spray Nutrivant Cereals 6-23-35+1MgO+0.1B+ME at the vegetative and reproductive stages to improve tillering and yield.

Guaranteed analysis

Oxide

N	Total Nitrogen	0%
P ₂ O ₅	Phosphorus Pentoxide	0%
K ₂ O	Potassium Oxide	0%

Application rates

Spray 1%-2% at 500 L water/ha during early growth stage:

1st spray at tillering

2nd spray at panicle initiation

3rd spray at heading

Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and the application of our products is beyond our control, ICL cannot be held responsible for any adverse results.

How to use

Spray a foliar application of Nutrivant Cereals 6-23-35+1MgO+0.1B+ME at the vegetative and reproductive stages will improve tillering and yield.

Attention

Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and as the application of our products is beyond our control, ICL cannot be held responsible for any adverse results. Contact your ICL advisor for more detailed advice.
