

SR-2000

The spreader you can depend on for years to come

Description

Spread seed and fertilizer efficiently with SR-2000, with its setting rate and shut-off control switch, limiting the amount of product wasted. The rotary spreader dispenses the product evenly over large areas. Boasting a capacity of 42 liters (22 kg) and a spread pattern from 2 to 6 meters, the spreader saves you time as you won't have to re-fill it too often. Plus, the durable stainless-steel frame is supported large wheels that won't leave any tracks during application.

Benefits

- \\ Reliable spreader – for years of dependable service
- \\ Sturdy stainless-steel frame
- \\ Equipped with a setting rate and shut-off switch

How to use

- 1 Use swath width recommended. Test the spread rate and pattern on a small area first.
- 2 Results can depend on weather, spreader condition and walking speed.
- 3 Empty, wash, clean, and dry after each use.
- 4 If you need more information, please contact your technical support.

Application rates

Trail first on a small scale before changing the rate, or any other variables, As circumstances can differ and the application of our products is beyond our control, ICL cannot be held responsible for any adverse results.
