## Description

Nutrivant Rice 0-46-30+2MgO+0.2B+FV is a fully soluble foliar formulation containing magnesium and boron designed to precisely meet the needs of rice. Utilizing Fertivant technology for an advanced and persistent delivery system guarantees a homogenous distribution of microdrops across the leaves, enhances the permeability of the cuticle to active substances, and securely fixes the active ingredients to the leaf surface to delay evaporation. Apply Nutrivant Rice 0-46-30+2MgO+0.2B+FV to increase the yield and quality of rice.

## Benefits

- \\ Dependability
- \\ Chloride-free, high safety
- \\ Enriched with magnesium and boron
- \\ Fully soluble
- \\ Contains surfactant
- \\ Special formula that is particularly useful for increasing yield and quality of rice
- \\ Made with clean materials
- \\ ICL's tight control of ingredients and manufacturing ensures consistent high quality.

## How to use

Nutrivant Rice 0-46-30+2MgO+0.2B+FV should be applied during 3 growth stages of the crop.

## Application rates

---

1-2% product at 500 L/ha per application

Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and the application of our products is beyond our control, ICL cannot be held responsible for any adverse results.

## Attention

Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and as the application of our products is beyond our control, ICL cannot be held responsible for any adverse results. Contact your ICL advisor for more detailed advice.
