

# H2Pro<sup>®</sup>

## Conserve Tablet

For efficient watering and hose-end application

## Description

Heal, prevent, and get to the root of any localized turf deficiencies with H2Pro<sup>®</sup> Conserve Tablets. Apply for immediate relieving effect from hydrophobic soil conditions, while simultaneously reducing your irrigation needs thanks to its unique water-conserving surfactant content. Treat up to seven average-sized golf greens with just one single tablet or combine with other wetting agents for accurate on-the-spot treatment.

## Benefits

- \\ Immediate plant stress relief
- \\ Loaded with Multi-matrix and 3D technology
- \\ Cures and prevents dry patch

## How to use

- 1 Apply H2Pro tablets in combination with a full wetting agent program to spot-treat hydrophobic areas. Dispense using a H2Pro Applicator.
- 2 Water-in following application to improve efficacy and assist wetting agent soil penetration. Enhance wetting agent penetration by applying after aeration programs, such as hollow tining, slitting, or scarification.
- 3 If you need more information, please contact your technical support.

## Application rates

One tablet will treat 6 – 7 average-sized golf greens. Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and the application of our products is beyond our control, ICL cannot be held responsible for any adverse results.

## Attention

Trial first on a small scale before changing the rate, application, or any other variables. As circumstances can differ and as the application of our products is beyond our control, ICL cannot be held responsible for any adverse results. Contact your ICL advisor for more detailed advice.
